Dorsalis Pedis Approach to tackle Flush Chronic Total Occlusion of Femoro-Popliteal Segment: A Case Report

Naga A: Department of Vascular Surgery, Alexandria University, Egypt
MD, MRCS (England)

Background
Female 69 years old
DM-HTN-MI
LT Fem-pop BK
RT CFA stent
C/O RT CLI

Conclusion
Using this retrograde approach for the first time in our center and achieving such an unexpected outcome have driven our team to believe that a simple retrograde maneuver might aid vascular interventionists in having higher limb salvage rates.
