Disclosure

Speaker name:
Torsten Fuss

I have the following potential conflicts of interest to report:

- [x] Consulting
- [ ] Employment in industry
- [ ] Stockholder of a healthcare company
- [ ] Owner of a healthcare company
- [ ] Other(s)

- [ ] I do not have any potential conflict of interest
Patient history

• 57 years old man
• PAOD Rutherford III right leg
• DU: complete diseased SFA with an occlusion around 12 cm length in the middle and distal
• ABI: 0.6 right limb
• Co – morbidities: art. Hypertension, smoker, Hyperlipoproteinemia
Pre-interventional angio
Primary interventional strategy

- 6F – cross-over-access
- Recanalization antegrad with 0.035 inch Stiff-guidewire and 4F – low-profil-supportcatheter
- Change to 0.018 inch guidewire and predilatation with a oversized balloon
- Stentimplantation (Supera)
- Final angio and occlusion of the puncture side with a closure – device
